He who plants thorns must never  
expect to gather roses.

...every good tree bears good  
fruit, but a bad tree bears bad  
fruit. A good tree cannot bear  
bad fruit and a bad tree cannot  
bear good fruit. Thus, by their  
fruit you will know them.

#### Your cholesterol is more than a number.

Everyone has cholesterol. Your body makes it naturally, and you can get it from the food you eat. If you've had a health screening recently, you were probably told numbers that represent your cholesterol levels. But cholesterol is more than numbers. It's a key indicator of your heart health. Keeping your cholesterol in the healthy range can help lower your risk of a heart attack or stroke.

#### Don't know your cholesterol?

There are a lot of **misconceptions about cholesterol**. For example, if you think people who are thin or young don't have to watch their cholesterol, you're mistaken. Please talk with your healthcare provider about a simple test to determine your cholesterol level.

Need to improve your cholesterol? Make these lifestyle tips from the American Heart Association a top priority.

- Use up at least as many calories as you take in.
- Eat a variety of nutritious foods from all the food groups.
- Eat less of the nutrient-poor foods.
- Also, don't smoke tobacco — and avoid secondhand smoke.

To get the nutrients you need, eat a dietary pattern that emphasizes:

- [fruits, vegetables](#),
- [whole grains](#),
- low-fat dairy products,
- [poultry, fish](#) and nuts,
- while limiting red meat and [sugary foods and beverages](#).
